

Name: Malik Zeenat Khalil

## Documentation for Internship at Kids Galaxy Pvt.Ltd

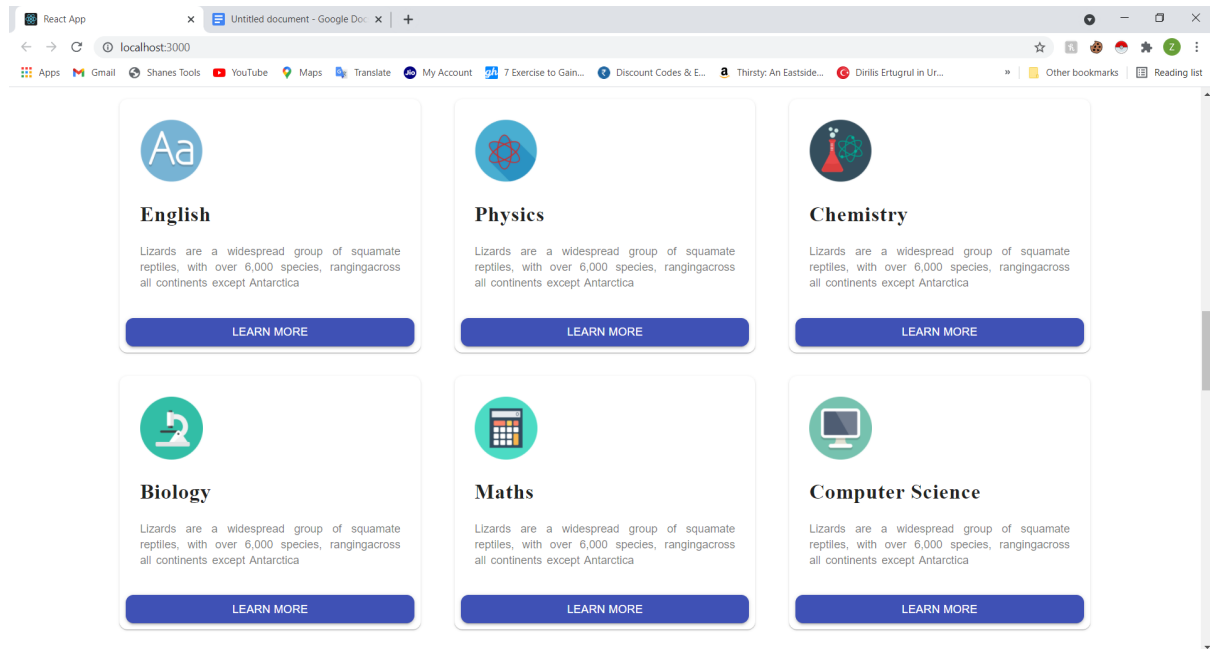

As per the given task, I created a React.js project using concepts like Material Ui and CSS. It is a Classes Project, it doesn't have any specific content but I used online content. I created a header using the material UI app-bar and made the whole project 100% responsive using Grid from Material UI. I've attached screenshots of each component below.

## Responsive cards using Material UI:

## Responsive card using HTML and CSS with hover effects:
